TRANSMITTAL OF SUPPLEMENTAL INFORMATION
DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicants and/or their attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicants nor their attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08a "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08a, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

As this application was filed after June 30, 2003, copies of the U.S. patents and published U.S. patent applications listed on the enclosed Form PTO/SB/08a are not required and, therefore, not included herewith.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. WIPO Patent Application No. WO 2004/011308 published February 5, 2004 discloses: An inflator bag for occupant restraint device and a method of manufacturing the inflator bag, the method comprising the steps of forming a rectangular box-shaped bag body having fourchette parts for assuring a height provided on the peripheral side surfaces thereof by forming a resin sheet or a metal sheet, forming folds for bending the fourchette parts inward at the vertical intermediate parts of the fourchette parts, forming triangular overlappingly folded parts overlappingly folded on the folded portion of the fourchette part on one side according to the folding of the fourchette part on one side at the end part of the fourchette part on the other side holding the corner part of the rectangular box-shaped bag body, folding flat the rectangular box-shaped bag body by folding the fourchette parts inward through the folds, and closing the

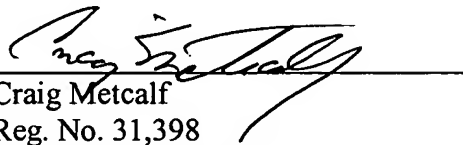

rectangular box-shaped bag body in a sealed structure by closing the bottom surface thereof opposed to the top plate by the bottom plate thereof, whereby the inflator bag for occupant restraint device compactly stored, developed in a stable shape while assuring a sufficient developing stroke, and processed easily can be provided.

2. German Patent Application No. DE 39 34 588 published April 25, 1991 discloses: The knee restraint is mounted under the dashboard of the passenger side, or the driver's position, and does not impede access to that seat. The integral gas generator is fitted onto the mounting plate, while a folded airbag is held in the cover. The support has thin sides of corrugated metal, which are extended by the gas before the airbag is inflated. The airbag is inflated via holes of controlled size in the outer plate of the support, and under the folded airbag. When the peak pressure has passed, air leaks out of the airbag, leaving the extended support over the knees. USE/ADVANTAGE - Knee restraint airbag in vehicle prevents seat occupant sliding under dashboard, and has compact mounting.

CERTIFICATION UNDER 37 C.F.R. § 1.97(e)

I hereby certify that each item of information listed on the enclosed Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this Information Disclosure Statement.

Respectfully submitted,

Craig Metcalf
